

Problem Description + Functional Requirements

Problem

There are many existing dating apps; however, there are no mainstream apps that are targeted only at college students. This creates an opportunity for our product: VTinder, a dating app for Virginia Tech students only. This product would appeal to Virginia Tech students who are looking to only date other Virginia Tech Students.

Target Users

User 1: The Dater

The goal of the Dater is to find other Virginia Tech students to date. To achieve this goal, the Dater has the functional requirements of:

- Making a profile with basic information about themselves
- See the profiles of other users on the app
- Filter the profiles of other users based on the information on their profile
- "Like" user profiles, or otherwise indicate that they are interested in or not interested in going on a date with another user
- Send a message to a user they have "matched" with (ie., a user who has "liked" the Dater and that the Dater has "liked" as well)
- Reporting users who the Dater suspects as acting in bad faith

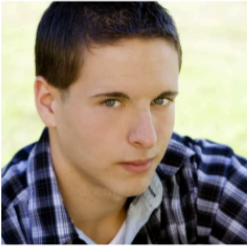

User 2: The Moderator

The Moderator has the duty of ensuring that VTinder remains a space conducive to the goal of allowing Virginia Tech students to find other Virginia Tech students to date. To achieve this goal, the Moderator has the functional requirements of:

- Seeing the profiles of all users on VTinder without having to go through the traditional matching process
- Seeing the messages sent by users on VTinder
- Viewing reports submitted by the Dater
- Removing users who are acting in bad faith
- Messaging any user on VTinder without going through the traditional matching process

Personas

The Dater: Austin Smith

Quick Facts

Age: 20
Occupation: Student
Location: Blacksburg, VA
Education: Studying for an undergraduate degree in Aerospace Engineering
Hobbies: Playing video games, studying with friends, searching for summer internships.

Biography

Austin is a junior at Virginia Tech who is looking to find a girlfriend who is also a Virginia Tech student. Ideally, he would like his girlfriend to also be a STEM major and either a sophomore or a junior.

He has tried other dating apps, but he often swiped left on people because he couldn't tell if they were VT students or what their major was or what year they were in, leading to more time spent on dating apps that he could have been using for other things.

Personality

Studious, Fun-loving, Kind, Introverted, Nerdy, Smart

Goals

- Find a girlfriend who is a VT student, a STEM major, and either a sophomore or junior
- Spend less time on dating apps

Frustrations

- Mainstream dating apps have users that aren't VT students
- Mainstream dating apps don't allow filtering by college-specific attributes like major or year

The Moderator: Gabriella Baker

Quick Facts

Age: 24
Occupation: Part-time Moderator
Location: Blacksburg, VA
Education: Bachelor's Degree in BIT, currently pursuing an MBA in Business Analytics
Hobbies: Reading, going to the gym, keeping up with the latest developments in cybersecurity

Biography

Gabriella is a moderator for VTinder. She is passionate about internet safety, and decided to join the team to make a little extra money while completing her master's degree.

She wants to be able to catch bad actors on the app as soon as possible. At previous jobs, she's had to spend a lot of time learning how to use complicated interfaces, and is worried that the same might be true for this job.

Personality

Extroverted, Protective, Compassionate, Creative, Friendly, Go-Getter

Goals

- Find and deal with bad actors on the app
- Quickly figure out how to navigate the moderator interface so she can start doing her job effectively

Frustrations

- Bad actors trying to join the app to scam people or prey on college students
- Complicated interfaces and processes make it hard for her to start work quickly

Backlog:

A1:C1	TO DO										
	A	B	C	D	E	F	G	H	I	J	K
1	TO DO				IN PROGRESS				DONE		
2	User Story	Story Points	Assignee	User Story	Story Points	Assignee		User Story	Story Points	Assignee	
3				As a Dater, I want to register for VTinder with a log in and password, so that I can ensure no unauthorised people can see my data		3 Ethan					
4								As a Dater, I want to make a profile with basic biographic information, so that I can tell other daters about myself.		3 Kathleen	
5								As a Dater, I want to upload at least one image to my profile, so that I can show other Daters what I look like.		5 Kathleen	
6	As a Dater, I want to see profiles that other Daters have made, so that I can judge if I would want to date them.		5 Kathleen								
7	As a Dater, I want to indicate whether I like or dislike a profile, so that I can narrow down my options.		2 Kathleen								
8	As a Dater, I want to see when I match with someone (if I like them and they like me), so that I connect with them.		5 Kathleen								
9	As a Dater, I want to message other Daters I match with on the app, so that I can connect with them without giving away my personal contact info.		5 Ethan								
10	As a Dater, I want to be able to report other Daters who I suspect are acting in bad faith, so that I keep the app safe and useful.		2 Kathleen								
11				As a Moderator, I want to register for VTinder with a log in and password that identifies me as a moderator, so that I can gain access to the unique Moderator functions that aren't available to Daters.		3 Ethan					
12	As a Moderator, I want to see all the users and their profiles, so that I can quickly identify and take action with specific users as needed.		3 Ethan								
13	As a Moderator, I want to see reports submitted by Daters, so that I can see what issues on the app I need to resolve.		2 Ethan								
14	As a Moderator, I want to be able to ban users who I determine are acting in bad faith, so that I can keep the app a safe space for Daters.		2 Ethan								
15	As a Moderator, I want to be able to message any user of the app, so that I can follow up on reports or any other issues.		5 Ethan								

Team Work Statement:

So far, we have been able to work together pretty smoothly. We have regular meetings to discuss how to approach problems, divide up the work, and we communicate regularly through text chat whenever we need to get on the same page about anything.

At this point, we are doing a 50/50 split, Ethan works mostly on backend and Kathleen works mostly on frontend. Kathleen has been able to finish the stories assigned for her sprint. Ethan has not been able to finish his assigned stories yet, partially due to the setup work involved for the API, partially due to underestimating his tasks. Code-wise, we've contributed about 50-50 to the project as it is so far. As for the total project, we would say it is about 30% complete.
